

Air Conditioning System Outdoor Unit

This is an outdoor unit of an air conditioning system. It features a protective grille covering a fan, designed for efficient heat exchange.

Product Overview

High-Efficiency Outdoor Air Conditioning Unit

This outdoor unit is engineered for both residential and commercial air conditioning systems, providing reliable heat exchange performance. It features a durable, weather-resistant casing designed to withstand various environmental conditions while maintaining operational efficiency. The integrated protective grille ensures safety and optimal airflow for the internal fan system.

Design & Construction

Enclosure

Weather-Resistant • Durable Casing

Safety Features

- Protective fan grille
- Heat exchange optimization
- External housing protection

Unit Type

Outdoor Air Conditioning Unit

Application

Recommended Use

Residential, Commercial

Technical Features

Primary Function

Efficient heat exchange
