

Air Conditioning Ventilation Unit with Sound Dampening

This ventilation unit is designed for air conditioning systems. It features a robust metal housing, a built-in fan, and sound-dampening material within the air passage.

Product Overview

High-Efficiency Ventilation Solution

This advanced ventilation unit is engineered specifically for air conditioning systems, providing robust airflow management while minimizing operational noise. Featuring a durable metal housing and integrated sound-dampening technology, it ensures a quiet and reliable performance suitable for professional environments. The unit is designed for easy installation on standard rail systems, making it a versatile choice for various HVAC applications.

Construction & Design

Noise Control

Sound Dampening • Low Noise

Housing Material

Robust Metal

Technical Features

Core Components

- Built-in Fan
- Sound-dampening material
- Metal housing

Mounting System

Rail System

Application

Suitable Applications

Air Conditioning, Ventilation Systems, HVAC
