

Air Conditioning Wiring Harness

This air-condition wiring harness ensures reliable and efficient electrical connections in air conditioning systems. Constructed with high-quality materials, it provides durability and optimal performance in diverse conditions.

Product Overview

High-Performance Wiring Solution

This air conditioning wiring harness is engineered to provide reliable and efficient electrical connectivity for HVAC systems. Featuring color-coded wiring and pre-terminated connectors, it simplifies the installation process while ensuring secure, long-lasting connections. Built with high-quality materials, this harness is designed to withstand diverse environmental conditions, offering a streamlined and organized solution for professional air conditioning units.

Technical Specifications

Key Features

- Color-coded wiring for easy identification
- Pre-terminated connectors for secure installation
- Durable construction for environmental resistance
- Streamlined, organized design

Suitability

Air Conditioning Systems, HVAC Equipment, Electrical Integration
