

Air-Cooled 4-Stroke Gasoline Engine

This 4-stroke gasoline engine features an air-cooled design and OHV configuration. It is suitable for powering generators, water pumps, tillers, and other machinery.

Product Overview

High-Performance Air-Cooled Engine

This 4-stroke, single-cylinder gasoline engine is engineered for reliability and efficient power delivery. Designed for versatility, it is an ideal solution for powering essential machinery such as generators, water pumps, and tillers. Its durable construction ensures longevity, providing consistent performance for demanding professional applications.

Technical Specifications

Displacement	196 cc
Bore x Stroke	68 x 54 mm
Engine Type	Air-Cooled, 4-Stroke, Single-Cylinder

Performance Metrics

Performance Highlights

6.5 HP

Max Power

3600 rpm

Rated Speed

11 Nm

Max Torque
