

Air-Cooled Diesel Engine Generator

Air-cooled diesel engine generators are designed for power generation. They are certified with ISO 9000:2000 for Quality Management Systems and ISO 14001:2004 for Environmental Management Systems.

Overview

Reliable Power Generation

This air-cooled diesel engine generator is engineered for consistent and dependable power output. Designed for demanding applications, it features robust construction and efficient cooling technology. It meets international standards for quality management and environmental responsibility, ensuring a reliable energy solution for professional use.

Technical Specifications

Cooling System	Air-cooled
Frequency	50 Hz
Engine Type	Diesel

Certifications

Quality & Environmental Certifications	ISO 9000:2000, ISO 14001:2004
