Overview

Reliable Air-Cooled Power Generation

These air-cooled diesel generator sets are engineered for efficiency and durability, providing a dependable power source for various professional applications. Designed with robust construction and advanced cooling systems, they ensure optimal performance even in demanding environments. These units are suitable for both open-frame configurations and general power needs.

Technical Specifications

Cooling System	Air-cooled
Engine Type	Diesel
Frame Configuration	Open Frame
Available Models	ND 5500CL, NDG7500E
Engine Displacement	424 cc
