

# Air-Cooled Direct Injection Diesel Engine

This is a single-cylinder, four-stroke diesel engine with air-cooled direct injection. It is designed for various industrial and machinery applications.

## Overview

### High-Performance Diesel Engine Series

This series of single-cylinder, 4-stroke diesel engines is engineered for robust performance in demanding industrial and agricultural environments. Featuring an air-cooled direct injection system, these units provide exceptional thermal management and high fuel efficiency. Designed for versatility, they are ideal for powering generators, water pumps, and various heavy-duty machinery.

## Technical Specifications

### Cooling System

Air-Cooled

### Engine Type

Single cylinder, 4-stroke

### Fuel System

Direct Injection

## Models

### Available Models

- JD170F/E
- JD178F/E
- JD178FA/E
