Product Overview

Precision-Engineered Cylinder Liner

This air-cooled engine cylinder liner is specifically engineered to meet or exceed OEM specifications for optimal fit and performance. Featuring a robust finned design, it ensures efficient heat dissipation and reliable operation under demanding conditions. The precision-machined bore promotes excellent piston ring sealing, helping to maintain engine efficiency and reduce oil consumption.

Technical Specifications

Bore Diameter	100 mm
Length	186 mm
Operating Temperature	-20 to 100°C

Logistics and Packaging

Gross Weight	20.5 kg
Quantity per Carton	4
Wooden Pallet Dimensions	106 x 124 x 95 cm
