

Air-Cooled Four-Stroke Engine

This is a single-cylinder, four-stroke engine that utilizes air-cooled technology. The engine features a silver-finished crankcase and cylinder head.

Overview

High-Performance Air-Cooled Engine

This single-cylinder, four-stroke engine is engineered for reliable performance and efficient heat dissipation. Featuring a robust silver-finished crankcase and cylinder head, it is designed for durability and consistent operation. The unit comes fully equipped with essential components, including a carburetor, spark plug, starter motor, and integrated wiring harness, making it a ready-to-integrate solution for various industrial and automotive applications.

Technical Specifications

Engine Type	Single-cylinder, four-stroke
Cooling System	Air-cooled (with integrated cooling fins)
Displacement Class	225 cc

Components & Equipment

Included Components

- Carburetor
- Spark plug
- Starter motor
- Wiring harness
- Electrical connectors

Design & Construction

Finish	Silver-finished crankcase and cylinder head
Key Features	Air-cooled, Four-stroke, Single-cylinder
