

Air-Cooled Four-Stroke Outboard Engine

This outboard engine is designed for small boats and watercraft. It features a compact, air-cooled gasoline engine coupled to a long shaft and propeller.

Product Overview

Reliable Marine Propulsion

This air-cooled four-stroke outboard engine is designed for efficient and reliable performance on small boats and watercraft. Featuring a compact single-cylinder architecture, it offers straightforward installation and operation for various marine applications. Its robust design ensures consistent propulsion, making it a dependable choice for recreational and light commercial use.

Technical Specifications

Engine Type	Four-stroke, single-cylinder
Cooling System	Air-cooled
Propeller Configuration	Three-blade
Shaft Type	Long shaft
Fuel Type	Gasoline

Design Features

Key Features	Compact Design, Air-Cooled, Four-Stroke, Easy Installation
