

Air-Cooled Single-Cylinder Motorcycle Engine

This is a high-quality motorcycle engine with a single-cylinder, air-cooled design. The engine features prominent cooling fins for efficient heat dissipation and includes components like the ignition coil and spark plug.

Product Overview

Reliable Air-Cooled Performance

This single-cylinder, four-stroke engine is engineered for durability and consistent performance in smaller displacement motorcycle applications. Featuring prominent cooling fins, the design ensures efficient heat dissipation during operation. It comes fully equipped with essential components including the ignition coil and spark plug, making it a ready-to-integrate solution for reliable power.

Technical Specifications

Included Components

- Ignition coil
- Spark plug
- Mounting hardware

Engine Type	Single-cylinder, Four-stroke
Cooling System	Air-cooled
Key Design Features	Air-cooled, Single-cylinder, Four-stroke, High-efficiency cooling fins
