

Air Curtain Door Fan

This electrical fan and exhaust fan is designed for both air conditioning and ventilation. It is typically mounted above doorways to create an air curtain, maintaining indoor temperature.

Overview

Air Curtain Door Fan

This high-performance air curtain fan is designed for effective climate control and ventilation. By creating a powerful, invisible air barrier across doorways, it efficiently prevents the entry of dust, insects, and outdoor drafts while maintaining a stable indoor temperature. It is an ideal solution for commercial and industrial environments requiring consistent climate separation.

Technical Details

Device Classification

Electric Fan • Exhaust Fan

Fan Type

Centrifugal

Application Category

Air Conditioning, Ventilation, Household Electrical Appliances
