

Air Curtain Fan for Commercial Use

This air curtain fan is designed to create a continuous barrier of air across an opening. It is commonly used in commercial and industrial settings to prevent air exchange and maintain a comfortable climate.

Product Overview

Professional Air Curtain Solution

This commercial-grade air curtain fan creates a continuous, high-velocity barrier of air across doorways, effectively separating indoor and outdoor environments. Engineered for efficiency and quiet operation, it minimizes heat loss, prevents dust and insect ingress, and maintains consistent climate control. Its robust construction and sleek, modern design make it an ideal installation for various architectural settings requiring reliable air quality management.

Technical Specifications

Construction Type	Cross-flow (/A)
Application	Commercial, Industrial, Climate Control

Key Benefits

Operational Benefits

- Energy efficient operation
- Quiet performance
- Dust and insect control
- Heat loss/gain prevention
- Easy installation and maintenance

Performance Highlights

1 High

Airflow Barrier Continuity

1 Low

Noise Level
