

Air Intake Filter Unit

This air filter unit is designed for machinery and industrial applications. It removes contaminants from the air intake, ensuring clean air flow for optimal performance.

Overview

Industrial Air Intake Filtration

This compact air filter unit is engineered for demanding industrial environments, providing essential protection for connected machinery and pumps. By effectively removing contaminants from the intake air, the unit ensures consistent, clean airflow, which is critical for maintaining optimal equipment performance and extending operational lifespan. Its robust construction and stable bracket-mounted design make it a reliable component for heavy-duty applications.

Technical Specifications

Design Type	Cylindrical filter housing
Mounting	Metal bracket assembly
Suitable Applications	Industrial Machinery, Pump Systems, Air Intake Systems
