

Air Moisture Control Filter

This filter is designed for air quality appliances. Its granular texture facilitates effective air filtration and moisture absorption.

Product Overview

Air Moisture Control Filter

This specialized air moisture control filter is designed for effective humidity regulation in various climate control systems. Featuring a granular, uniform material structure, it is engineered to maximize surface area for optimal moisture absorption and air filtration. Ideally suited for integration into professional-grade humidifiers and dehumidifiers, this component ensures consistent performance and air quality maintenance.

Technical Specifications

Compatible Equipment

- Humidifiers
- Dehumidifiers

Material Structure

Granular, uniform texture

Primary Function

Air Filtration, Moisture Absorption, Humidity Regulation
