

# Air Plasma Cutter with Digital Control

This air plasma cutter is designed for industrial use and features a digital current meter for precise control. Adjustable settings and safety features make it suitable for efficiently cutting various metals.

## Overview

### Industrial Air Plasma Cutter

This air plasma cutter is engineered for demanding industrial applications, offering high-precision metal cutting capabilities. It features an integrated digital current meter for exact control over cutting parameters, ensuring consistent performance. Designed for efficiency and portability, the unit includes a robust housing with effective ventilation and ergonomic carrying handles for easy transport across the workshop.

## Key Features

### Core Features

Digital Current Meter, Industrial Grade, Adjustable Settings, Portable Design

## Technical Specifications

### Performance Metrics

**100 A**

Rated Cutting Current

### Model Number

CUT-100

## Safety & Design

### Design Specifications

- Robust protective housing
- Integrated ventilation system
- Ergonomic carrying handles
- Digital control interface
