Product Overview

High-Efficiency Air Precleaner

This air precleaner is designed to enhance the performance and longevity of construction machinery engines. By utilizing centrifugal force, it effectively removes dust, dirt, insects, rain, and snow from the intake air before it reaches the main filter. This maintenance-free, self-powered design requires no additional energy, ensuring optimal engine health and reduced downtime in harsh operating environments.

Technical Specifications

Operating Principle	Centrifugal separation via swirling air
Power Source	Swirling air (no external power required)
Contaminants Removed	Dust, Dirt, Insects, Rain, Snow

Logistics & Availability

Stock Status

Large Stock Available

Lead Time

Very short
