

Air-Pressure Ventilating Fan with Plastic Housing

This air-pressure ventilating fan is made with a full plastic housing. The fan's air-pressure mechanism helps prevent backdrafts and maintain consistent ventilation.

Product Overview

Efficient Ventilation Solution

This full plastic air-pressure ventilating fan is engineered for efficient air extraction in residential and small commercial spaces. Its durable, corrosion-resistant plastic construction ensures long-term reliability even in humid environments. Featuring aerodynamically optimized blades, it delivers maximum airflow while maintaining minimal noise levels, making it ideal for bathrooms, kitchens, and small offices.

Key Features

Material	Full Plastic
Backdraft Prevention	Yes
Suitable Applications	Bathroom, Kitchen, Small Office

Performance

Operational Benefits

- Aerodynamically optimized blades for high airflow
- Low noise operation
- Corrosion-resistant housing
- Easy installation and maintenance
