

Air-Pressure Ventilating Fan with Plastic Housing

This air-pressure ventilating fan is made with durable plastic. It facilitates ventilation by promoting air circulation and reducing humidity.

Product Overview

Efficient Air Ventilation Solution

This full plastic air-pressure ventilating fan is engineered for effective air extraction in diverse environments. Featuring a durable, corrosion-resistant plastic housing, it is designed for longevity and ease of maintenance. The aerodynamic blade design maximizes airflow while minimizing noise output, making it an ideal choice for kitchens, bathrooms, and other spaces requiring consistent air circulation.

Technical Specifications

Key Features

- Corrosion-resistant construction
- Aerodynamic blade design
- Low-noise operation
- Easy to clean

Suitable Environments

Kitchen • Bathroom • Residential Ventilation

Housing Material

Plastic

Installation Options

Window Mount, Wall Mount
