

Air Purifier with Advanced Filtration

This air purifier is designed for efficient air purification. It features advanced filtration technology to remove dust, pollen, smoke, and other airborne particles.

Overview

High-Performance Air Purification

This advanced air purifier is engineered for efficient air quality management in indoor environments such as homes and offices. Utilizing sophisticated filtration technology, it effectively captures dust, pollen, smoke, and various airborne particulates. The unit includes a remote control for seamless operation and is designed to maintain a cleaner, healthier atmosphere.

Technical Specifications

Filtration Capabilities

- Dust removal
- Pollen filtration
- Smoke elimination
- Formaldehyde and Benzene removal
- Sterilization

Model Number	GL-2108
Core Features	Advanced Filtration, Remote Control, Photocatalyst Technology, Formaldehyde Removal

Usage

Recommended Environments

Residential • Office • Indoor Spaces
