

Air Purifier with HEPA Filter

This air purifier features a touch panel and H13 HEPA filter. It has a CADR of 280m³/h and offers optional negative or plasma ionization.

Overview

High-Efficiency Air Purification

This air purifier is designed to significantly improve indoor air quality by effectively removing dust, pollen, smoke, and other common airborne particles. It utilizes a comprehensive multi-stage filtration system, including a pre-filter, a high-efficiency HEPA filter, and an activated carbon layer to neutralize odors and gases. With customizable fan speeds, a built-in timer, and a convenient filter replacement indicator, this unit ensures optimal performance and ease of use for various indoor environments.
