

Air Source Heat Pump for Heating and Cooling

This air source heat pump provides both heating and cooling. It uses R410A refrigerant and is designed for efficient climate control.

Product Overview

High-Efficiency Climate Control

This advanced air-to-water heat pump provides an efficient solution for both residential and commercial heating and cooling requirements. Utilizing high-performance compressor technology and an oversized evaporator, the system maximizes energy savings by over 75% compared to traditional heaters. Designed for reliability and ease of use, it features a fully automatic operation system and an intuitive LCD touch screen interface.

Technical Specifications

Performance Metrics

75 %

Energy Consumption Reduction

Compressor Technology	High-performance industrial compressor
Water Pressure Range	0.6 - 0.9 Mpa
Control Interface	LCD Touch Screen, Fully Automatic Start/Stop, Temperature-based Control

Logistics & Terms

Warranty	14 months from delivery
Minimum Order Quantity	3
Packaging	Standard Export Plywooden Crate with internal plastic protection
Typical Lead Time	15 days after deposit receipt
