

Airbrush System with Dual Fan Air Compressor

This airbrush system includes a dual fan air compressor for optimal cooling. It is designed for professional gravity airbrush applications, providing consistent air pressure for precision and reliability.

Overview

Professional Airbrushing System

The AG-326 Airbrushing System is engineered for professional gravity airbrush applications, delivering consistent air pressure and reliable performance. Featuring a Cool Runner II dual fan air compressor, the unit is designed for efficient cooling and extended operational longevity. This system is an ideal solution for artists, hobbyists, and professionals who demand precision, reliability, and consistent results in their airbrushing tasks.

Technical Specifications

Suitability

- Professional Artists
- Hobbyists
- Precision Airbrushing

Cooling Technology

Dual Fan Cool Runner II

Application Type

Professional, Gravity Feed, Precision Work
