

Aircraft Catering Truck with Hydraulic Lift

This specialized vehicle efficiently and safely delivers catering supplies to aircraft. Its hydraulic lift platform, complete with safety railings, allows personnel to easily load and unload food and beverage carts.

Product Overview

Aviation Catering Efficiency

This specialized catering truck is designed for the secure and efficient transport and loading of aircraft supplies. It features a robust hydraulic lift platform equipped with safety railings to ensure personnel protection during the delivery of food and beverage carts. An insulated box body ensures temperature integrity is maintained, while integrated outriggers provide essential stability during apron operations.

Technical Specifications

Vehicle Category	Aircraft Catering Truck
Lifting Mechanism	Hydraulic lift platform
Safety Equipment	Hydraulic lift railings, Stabilizing outriggers

Performance

Cargo Handling

- Food cart transport
- Beverage cart transport
- Temperature-controlled storage

Chassis Build	Robust truck chassis
Primary Application	Airport apron
