

Aircraft Cleaning Truck for Exterior Maintenance

This aircraft-cleaning truck is designed for efficient and thorough cleaning of aircraft exteriors. It features a robust chassis, a water tank with a substantial capacity, and a high-pressure cleaning system.

Overview

Professional Exterior Maintenance Solution

This specialized aircraft cleaning truck is engineered for efficient and thorough exterior maintenance in demanding airport environments. Built with a robust chassis and corrosion-resistant water tank, it ensures long-term reliability and water purity. The system integrates a high-pressure cleaning assembly with adjustable settings, allowing for versatile application across various aircraft types.

Technical Specifications

Cleaning System	High-pressure assembly with adjustable settings
Tank Material	Corrosion-resistant material

Safety Features

Safety Systems	Pressure relief valves, Emergency shut-off
