

Airport Luggage Wrapping Machine with Adjustable Tension

This airport luggage wrapping machine is designed to securely wrap luggage with stretch film, protecting it from damage, theft, and tampering. It features a rotating platform to accommodate various luggage sizes and shapes.

Overview

Professional Luggage Security Solution

This airport luggage wrapping machine is engineered to provide robust protection for passenger baggage during transit. By utilizing stretch film, it effectively shields luggage from physical damage, unauthorized tampering, and theft. Designed for high-traffic environments, the unit features a rotating platform and adjustable tension controls to accommodate diverse luggage sizes while ensuring a secure, tight wrap every time.
