

# Airport Maintenance Aerial Work Platform Truck

This specialized truck features an aerial work platform for maintenance and inspection tasks at airports. The platform is mounted above the truck cab, providing elevated access to aircraft and other airport infrastructure.

## Product Overview

### Professional Airport Maintenance Vehicle

This specialized aerial work platform truck is engineered for high-altitude maintenance and inspection tasks within airport environments. Featuring an integrated platform mounted above the cab, it provides safe and reliable access to aircraft and terminal infrastructure. This vehicle is built on a robust chassis, ensuring durability and performance for demanding airport ground support operations.

## Technical Specifications

Base Chassis	Isuzu FVR
Primary Applications	Aircraft Inspection, Lighting Maintenance, Structural Cleaning, Ground Support

## Features

### Vehicle Design

- Elevated aerial work platform
- Cab-mounted platform configuration
- Durable industrial-grade chassis
- High-visibility color scheme
