

Alcohol Pad Packaging Machine

This automatic packaging machine is designed for high-volume production of individually packaged alcohol pads. It features robust construction with a stainless steel finish, ensuring durability and hygiene.

Product Overview

Advanced Alcohol Pad Packaging Solution

This automatic packaging machine is engineered using world-class paper and non-woven packaging technology, specifically designed for the high-volume production of alcohol pads and various moist towelettes. It features a robust, stainless steel construction that ensures durability and maintains high hygiene standards for medical and cosmetic applications. The system utilizes top-tier components for its drive and control mechanisms, providing reliable, stable operation for diverse packaging requirements.

Machine Capabilities

Packaging Style	Four sides sealing
Compatible Products	Alcohol Pads, Moist Towelettes, Antiseptic Wipes, Medical Wipes, Cosmetic Wipes
Size Customization	Requires change of heater platens for different wipe sizes

Technical Features

Interface Languages
