

# All-Steel Gear Head Vertical Drilling Machine

This vertical drilling machine features an all-steel gear drive headstock and a work table with 'T' slots. It is designed for precision in metal cutting applications and offers variable speed control.

## ADDITIONAL IMAGES

## Product Overview

### Professional All-Steel Vertical Drilling Machine

This robust vertical drilling machine features an all-steel gear drive headstock designed for precision metal cutting applications. It offers advanced versatility with a drill-mill head that swivels 360° vertically and a multi-stage spindle power feed system. Equipped with fine manual downfeed and positive locking mechanisms for the table, head, and column, this machine provides the stability and control required for high-accuracy industrial tasks.

## Operational Specifications

### Spindle Speeds

- 80
- 375
- 710
- 1250

### Power Feed Steps

6 steps

## Design Features

### Positive Locking Components

- Table
- Head
- Quill
- Column

### Head Swivel Capacity

360 degrees

### Key Mechanical Attributes

All-steel gear drive, Fine manual downfeed, Auto-release tools, Adjustable headstock, Adjustable worktable

## Equipment & Accessories

Coolant Delivery	Yes
Work Table Design	T-slot configuration
