Overview

All-Terrain Tracked Crawler Transporter

This versatile tracked transporter is designed for high efficiency in demanding environments such as farmland, mountain slopes, and construction sites. Featuring a lightweight body for convenient transportation, it excels at pulling building materials and goods through narrow roads and challenging terrains. With a 45-degree climbing capability and wading functionality, it provides a reliable solution where conventional vehicles cannot operate.

Key Performance Metrics

45° climbing angle

Climbing Wading Narrow road

Engineered for extreme environments, capable of a 45-degree climbing angle and wading through shallow water.

Performance Highlights

1 ton

Bearing Weight

45 °

Climbing Angle

1.5 m

Turning Radius

500 kg

Crane Capacity

Technical Specifications

Technical Details

Feature	Specification
Model	YX-150
Engine	Diesel engine 190
Gearbox Material	Ductile iron 190
Drive Way	Diesel engine
Net Weight	720 kg

Dimensions & Capacity

Dimensions & Capacity

- Overall Dimensions: 2100*1050*1250mm
- Cargo Box Size: 1400*1050*500mm
- Crawler Specifications: 230*72*46mm

Mobility & Control

3

Thickened steel wire rubber track

Detail analysis

1

Semi-automatic operation, multi-gear adjustment control

Heavy-duty tracks featuring thickened steel wire reinforcement for maximum durability in rocky or uneven terrain.

Intuitive semi-automatic control interface with 3 forward gears and reverse for precise maneuvering.

Track System	Steel wire reinforced rubber track
Transmission	Semi-automatic multi-gear adjustment (R, 1, 2, 3)

Operational Features

2

Configure hydraulic lift

Integrated hydraulic lift and dump system facilitates easy unloading of heavy materials.

Handling Features	Hydraulic Dump, Hydraulic Lift, Crane Function, Wading Capable, Narrow Road Access
-------------------	--

Applications

Ideal Applications

- Farmland transportation
- Mountain climbing and transport
- Construction site material hauling
- Building material logistics
