Overview

High-Performance Sport ATV

The BS250AS-43 is a sport-style all-terrain vehicle engineered for superior off-road performance and reliability. It features a water-cooled CG250 engine and an advanced EFI system, ensuring compliance with Euro IV emission standards while providing excellent fuel economy. Designed with a high-strength perimeter frame and independent suspension, this ATV offers a perfect balance of comfort, maneuverability, and safety for both recreational and utility use.

Key Performance Metrics

Performance Highlights

250 cc

Engine Displacement

12 L

Fuel Capacity

4 Euro

Emission Standard

Engine & Transmission

Engine Type	CG250 water-cooled engine
Fuel System	Italy DELLORTO EFI system
Drive System	Chain drive with differential

Chassis & Suspension

Suspension System	Four wheel double swing arm independent suspension
Frame Structure	High-quality steel tube perimeter frame

Braking & Wheels

Tire Dimensions

Position	Size	Type
Front	21x7-10	Tubeless
Rear	20x10-10	Tubeless

Braking System	Front and rear disc brake CBS combined braking system
----------------	---

Wheel Hubs	Integrally formed aluminum alloy
------------	----------------------------------

Technology & Features

Key Benefits

- Low rotation rate and large torque
- Small engine vibration
- High-quality shock absorbers
- Anti-heat and water recession braking performance
- Strong impact resistance

Display	Full digital LCD instrument
---------	-----------------------------

Compliance

Certifications	Euro IV, Euro 4 Standard
