

All-Terrain Vehicle for Recreational Use

This all-terrain vehicle is designed for recreational use. It features a robust engine and sturdy frame for enhanced durability and comfortable rides on various terrains.

Overview

Versatile All-Terrain Performance

The ATA150-G is a robust all-terrain vehicle engineered for reliable recreational use and off-road utility. It features a 150CC air-cooled 4-stroke engine paired with an automatic transmission and convenient electric start for ease of operation. With a focus on safety and control, it includes essential features like a speed limiter, an engine kill switch, and a dual braking system for confident handling across various terrains.
