

Alloy Adjustable Grass Shear

This professional-grade grass shear features durable alloy blades for long-lasting sharpness. Its adjustable cutting head and ergonomic handles provide versatile use and comfortable grip.

Product Overview

Professional Alloy Grass Shears

These professional-grade grass shears are engineered for precision and durability in landscaping applications. Constructed with high-quality 65# manganese steel, the blades undergo high-temperature quenching treatment to ensure long-lasting sharpness and edge retention. The ergonomic design features a new material TPR handle and a 20-degree folding angle to enhance comfort and reduce user fatigue during extended trimming tasks.

Technical Specifications

Blade Material	65# Manganese Steel
Blade Treatment	High-temperature quenching
Folding Angle	20 degrees

Design & Ergonomics

Handle Material	TPR (Thermoplastic Rubber)
Key Features	Adjustable, Ergonomic Grip, High-Carbon Steel, Precision Cutting
