

Alloy Grass Cutting Saw Blade

Alloy saw blades are designed for efficient grass cutting. Constructed from durable alloy materials, they offer extended wear resistance and maintain sharpness for consistent performance.

Item No.	Outer Diameter (in)	Outer Diameter (mm)	Teeth Count	Material	Weight (kg)
CF64001	9"	230	36	Alloy Steel	0.8
CF64002	9"	230	40	Alloy Steel	0.9
CF64003	10"	255	36	Alloy Steel	1.0
CF64004	10"	255	40	Alloy Steel	1.1

Product Overview

High-Performance Alloy Grass Cutting Blades

These professional-grade alloy saw blades are engineered for efficient and consistent grass cutting performance. Constructed from durable, wear-resistant alloy materials, they are designed to maintain sharpness over extended use. With multiple configurations available in 9-inch and 10-inch diameters, these blades offer versatile solutions for various grass trimming applications.

Technical Specifications

Blade Dimensions

Item Number	Outer Diameter (in)	Outer Diameter (mm)	Teeth Count
CF64001	9	230	36
CF64002	9	230	40
CF64003	10	255	36
CF64004	10	255	40

Standard Measurements

25.4 mm

Hole Diameter

1.3 mm

Body Thickness

2 mm

Kerf

Features

Material Benefits

Durable Alloy, Wear Resistant, Maintains Sharpness
