

Alloy Steel Drill Bit for Metalworking

This alloy steel drill bit is designed for drilling applications. It features a flat handle and durable alloy steel construction.

Product Overview

High-Performance Alloy Steel Drill Bit

This alloy steel drill bit is engineered for demanding petroleum prospecting and petrochemical engineering applications. Its robust construction ensures durability and longevity in challenging drilling environments. Featuring precision-engineered flutes, the design promotes efficient chip evacuation and reduced friction, which helps maintain optimal drilling speed and accuracy.

Technical Specifications

Material	Hard Alloy Steel
Handle Design	Flat handle
Primary Applications	Petroleum Prospecting, Petrochemical Engineering, Metalworking

Performance Features

Key Benefits

- Robust construction for durability
- Precision-engineered flutes
- Efficient chip evacuation
- Reduced friction during operation
