

Alloy Steel Eye Hook with Slip Latch

This eye hook features a slip latch for quick connections and secure lifting. Constructed from alloy steel, it provides exceptional strength and durability for construction, industrial, and marine environments.

Product Overview

Heavy-Duty Lifting Performance

The S-320 US Type Eye Hook is a robust solution engineered for demanding rigging and lifting operations. Constructed from premium alloy and carbon steel, it features a reliable slip latch mechanism designed to prevent accidental disengagement during use. This heavy-duty hook is ideal for industrial, marine, and construction environments requiring secure and efficient load handling.

Technical Specifications

Steel Grade

G80

Load Capacity

1 T

Minimum Capacity

8 T

Maximum Capacity

Model Number

S-320

Manufacturing Process

Drop forged, Heat treated

Material and Finish

Materials

- Alloy steel
- Carbon steel

Surface Treatment Options

Color-painted, Self-colored, Polished, Hot-dipped galvanized, Electro galvanized

Logistics

Packaging Details

Packed in cartons with plastic bags inside on iron pallets
