

# Alloy Steel Socket Head Cap Screws

High-strength socket head cap screws made from alloy steel. These fasteners feature a cylindrical head with a recessed hexagonal socket for high torque application.

## Product Overview

### High-Strength Alloy Steel Fasteners

These socket head cap screws are engineered from high-strength alloy steel, designed for demanding industrial applications. Featuring a cylindrical head with a recessed hexagonal socket, they allow for high-torque application using standard hex keys. The black oxide finish offers both corrosion resistance and a professional aesthetic, making them ideal for machinery, automotive, and construction projects.

## Technical Specifications

### Surface Finish

Black Oxide

### Material

Alloy Steel

### Head Style

Cylindrical Socket Head

### Drive Type

Hexagonal Socket

## Applications

### Common Applications

Machinery, Automotive, Construction
