

Alumina Emery Cloth Roll for Grinding and Polishing

This alumina emery cloth is designed for grinding, polishing, and finishing across various materials. Its durable construction and range of grit sizes make it suitable for both hand and machine sanding applications.

Product Overview

High-Performance Abrasive Solution

This alumina emery cloth roll is engineered for professional-grade grinding, polishing, and finishing applications. Designed with a durable, tear-resistant backing, it provides extended service life for demanding tasks. It is versatile enough to be used effectively on metal, wood, and plastic surfaces, making it a reliable choice for both hand and machine sanding operations.

Technical Specifications

Usage Method

Hand Sanding • Machine Sanding

Durability Features

- Strong backing material
- Tear resistance
- Extended use design

Abrasive Material	Alumina
Compatible Surfaces	Metal, Wood, Plastic
