

Aluminium Oxide Fiber Discs for Grinding and Finishing

These high-performance aluminium oxide fibre discs are designed for grinding, blending, and finishing on various materials. The durable fibre backing provides increased strength and tear resistance, ensuring a long lifespan and consistent performance.

Product Overview

High-Performance Grinding Solutions

These aluminium oxide fibre discs are engineered for demanding metalworking applications, including grinding, blending, and finishing. Featuring a tough fibre backing, they offer superior strength and tear resistance for an extended service life. Designed for use with standard angle grinders, these discs provide the aggressive cutting action necessary for effective weld removal, deburring, and surface preparation.

Technical Specifications

Compatible Tools

- Angle Grinders

Key Features

Durable • Tear Resistant • Aggressive Cutting • Long Lifespan

Abrasive Material

Aluminium Oxide

Backing Material

Tough Fibre

Primary Applications

Grinding, Blending, Finishing, Weld Removal, Deburring, Surface Preparation
