

Aluminum Alloy Busway System

This aluminum alloy busway system is designed for efficient and reliable power distribution. The modular design allows for flexible configuration and easy installation in commercial, industrial, and data center applications.

Product Overview

Aluminum Alloy Busway System

This aluminum alloy shell busway system is engineered for efficient and reliable power distribution across diverse environments, including commercial buildings, industrial facilities, and data centers. Its robust construction features high-quality aluminum housing that provides excellent conductivity and superior heat dissipation. The modular design ensures flexible configuration and simplified installation, offering a cost-effective, space-saving alternative to traditional cabling.

Technical Specifications

Housing Material	Aluminum Alloy
Design Features	Modular Design, High Heat Dissipation, Space-Saving, Robust Construction

Performance

Key Performance Metrics

1 High

Short-Circuit Withstand Capacity

Applications

Suitable Environments

- Commercial Buildings
- Industrial Facilities
- Data Centers

Installation & Usability

Installation Type

Modular • Flexible Configuration
