

Aluminum Alloy Diaphragm Housing for Pneumatic Systems

This precision-engineered housing diaphragm is designed for robust performance in demanding industrial applications. Constructed from high-grade aluminum alloy, this diaphragm housing offers exceptional durability and resistance to corrosion, making it ideal for use in pneumatic systems and pumps.

Product Overview

Precision Aluminum Diaphragm Housing

This precision-engineered diaphragm housing is designed for robust performance in demanding industrial applications. Constructed from high-grade aluminum alloy, it offers exceptional durability and superior resistance to corrosion. The component features a cylindrical body with a square flange and integrated mounting holes, ensuring secure attachment and optimal functionality for pneumatic systems, pumps, and machinery requiring precise pressure regulation.

Technical Specifications

Design Features

- Cylindrical body
- Square flange
- Integrated mounting holes
- Central cylindrical protrusion for diaphragm support

Material	High-grade aluminum alloy
Primary Application	Pneumatic Systems, Pumps, Industrial Machinery
