

Aluminum Alloy Multi-Spoke Wheel

This high-performance aluminum alloy wheel is designed for superior strength and lightweight construction. Its precision engineering ensures optimal fit and balance, providing smooth ride quality and enhanced handling.

Overview

High-Performance Aluminum Alloy Wheels

This multi-spoke aluminum alloy wheel is precision-engineered to provide a balance of superior strength and lightweight construction. The design features enhanced aesthetics and improved heat dissipation, ensuring optimal performance and handling across various driving conditions. Finished with a durable, corrosion-resistant coating, these wheels are built for longevity and protection against the elements.

Key Features

Performance Highlights

10428

Model Number

Technical Specifications

Available Sizes

- 20 * 8.5
- 22 * 9.0

Material	Aluminum Alloy
----------	----------------

Design & Finish

Design Style	Multi-Spoke
Finish Properties	Corrosion-Resistant, Durable Coating, Heat Dissipating

Application

Core Benefits

Lightweight • High Strength • Precision Engineered • Enhanced Handling

Vehicle Compatibility	Suitable for many kinds of cars
-----------------------	---------------------------------
