Product Overview

High-Durability Aluminum Parking Curb

This professional-grade parking curb is engineered from high-strength aluminum die-casting alloy, designed to withstand heavy vehicle pressure without cracking or warping. Featuring a specialized electrostatic spraying process, the unit is corrosion-resistant, UV-proof, and colorfast for long-term outdoor reliability. Integrated 3M reflective film ensures superior visibility and pedestrian safety, making it an ideal solution for commercial, industrial, and residential parking management.

Physical Dimensions

Dimensions

550 mm
Length

120 mm
Width

100 mm
Height

Material Thickness

3.5 mm

Material & Construction

Material	Aluminum die-casting alloy
Surface Treatment	Hardness electrostatic spraying

Features & Performance

Key Features	UV-proof, Corrosion-resistant, Colorfast, High-visibility, Reflective
Visibility Technology	3M reflective film

Installation & Usage

Installation Compatibility

- Pre-drilled holes for secure mounting
- Suitable for asphalt surfaces
- Suitable for concrete surfaces

Ideal Environments

Parking Lots • Garages • Commercial Areas • Industrial Zones
