Product Overview

High-Efficiency Aluminum Alloy Pressure Cooker

This durable pressure cooker is crafted from premium A3003 aluminum alloy, designed to meet the rigorous demands of professional kitchens. Featuring a sophisticated multi-layer construction, it ensures rapid and uniform heat distribution while maintaining high corrosion resistance for hygienic food preparation. The cooker is engineered for maximum versatility and safety, incorporating a secure locking mechanism, a pressure release valve, and ergonomic heat-resistant Bakelite handles.

Material & Construction

Surface Finish

- Outer: Mirror Polished
- Inner: Matt Polished

Materials Used

A3003 Aluminum Alloy, Bakelite

Compatibility & Performance

Cooking Capabilities

- Steaming
- Stewing
- Braising
- Boiling

Stovetop Compatibility

Gas, Electric, Ceramic, Halogen, Induction

Safety & Features

Safety Mechanisms

- Pressure release valve
- Secure locking mechanism
- Anti-temperature Bakelite handle

Packaging & Assembly

Individually packed in color box with un-assembled handle for compact transport.
