

Aluminum Alloy Pressure Cooker with Inner Lid

This pressure cooker features a durable aluminum alloy body and lid with a mirror-polished exterior and satin-finished interior. It includes a lower pressure inner lid, a bakelite handle, and is compatible with various cooktops including gas, electric, ceramic, halogen, and induction.

Product Overview

Professional Aluminum Pressure Cooker

This durable aluminum alloy pressure cooker is designed for high-efficiency cooking in professional and domestic environments. Featuring a secure inner lid design, it ensures reliable pressure regulation while helping to preserve food nutrients and reduce cooking times. The versatile construction makes it compatible with all major stovetops, including induction, electric, and gas.
