

# Aluminum Bronze Casting Mold

This precision-engineered aluminum bronze mold is designed for high-performance casting applications. It features intricate internal channels and a perforated core to ensure optimal material distribution and cooling.

## Product Overview

### Precision Aluminum Bronze Casting Mould

This precision-engineered aluminum bronze mould is specifically designed for high-performance casting applications in demanding industrial environments. Featuring a robust, multi-piece construction with intricate internal channels and a perforated core, it ensures optimal material distribution and superior cooling efficiency. Its durable design guarantees consistent dimensional accuracy, making it an ideal solution for complex manufacturing requirements.

## Technical Specifications

### Construction Features

- Multi-piece construction
- Intricate internal channels
- Perforated core
- Precision machined exterior

Model Identifier	T6G06 WH 01
Material	Aluminum Bronze
Performance Benefits	High-performance casting, Optimal cooling, Dimensional accuracy, Industrial durability
