Overview

Advanced Beverage Canning Solution

This high-speed aluminum can filling and sealing machine utilizes advanced Swiss technology to provide a reliable solution for beverage production. Specifically designed for carbonated drinks and beer, the system ensures precision and hygiene throughout the packaging process. Its robust stainless steel construction and automated handling make it an ideal choice for professional bottling plants seeking efficient output.

Performance

Production Capacity

2000 CPH

Min Output

9000 CPH

Max Output

Technical Specifications

Material

Stainless Steel • Food Grade

Machine Type

Automatic Rotary Filling and Sealing

Filling System

Multi-head high-speed rotary system

Applications

Container Compatibility

- Aluminium Cans
- Standard Beverage Cans

Suitable Beverages

Carbonated Drinks, Beer, Liquid Food Products

Design Features

Key Features

- Swiss-inspired filling and sealing technology
- Transparent enclosures for process monitoring
- Integrated control panel for parameter adjustment
- Automated can handling system
