

Aluminum Die-Cast LED Light Housing

Aluminum die-cast LED light housing provides efficient heat dissipation. Designed for outdoor lighting applications, it offers a robust and weather-resistant enclosure.

Product Overview

High-Performance LED Housing

This aluminum die-cast housing is precision-engineered to provide a robust, weather-resistant enclosure for LED components. Designed for optimal heat dissipation, it ensures the longevity and efficiency of your lighting systems in various outdoor applications. The durable construction makes it an ideal choice for reliable, long-term performance.

Technical Performance

Photosynthetic Efficiency

161 lm/w
Efficiency

Voltage Range 1.9 - 4V

Response Time Nanoseconds

Stability Lifespan 100000 hours

Features & Benefits

Key Advantages

- High vibration resistance (solid-state design)
- Low voltage power supply for enhanced safety
- Mercury-free and environmentally friendly
- Pure light color with no variegated light

Environmental Compliance Mercury-Free, Eco-Friendly
