

Aluminum Die-Cast Motorcycle Wheel

This aluminum die-cast motorcycle wheel is precision-engineered for smooth operation and reliable braking. It is designed for optimal performance and durability and is suitable for various motorcycle models.

Product Overview

High-Performance Die-Cast Wheel

This aluminum die-cast motorcycle wheel is engineered for optimal performance and structural integrity. Utilizing advanced die-casting techniques, it ensures high dimensional accuracy and reliable operation. With a corrosion-resistant finish and precise machining, this component is designed to meet rigorous standards for durability and smooth performance.

Technical Specifications

Material	ADC12 Aluminum
Dimensional Precision	0.02 mm
Surface Roughness	Ra0.8
Shrinkage Rate	0.5 %
Machining Allowance	0.5 mm
Material Wastage Rate	5 %

Finishing

Surface Preparation	Sand blasted, Shot blasting, Powder coating
---------------------	---

Capabilities

Manufacturing Capabilities

- Die casting
- CNC machining
- QA control
