Product Overview

Automated Filling and Sealing Solution

This high-efficiency filling and sealing machine is engineered for the automated production of milk, lactic acid bacteria, soy milk, juice, and similar liquid products. It integrates advanced functions including normal pressure filling, automatic cover placement, electric heating sealing, and optional screw capping. Designed for modern enterprise needs, the system utilizes high-quality components for PLC control, temperature regulation, and photoelectric pneumatic management to ensure consistent, hygienic, and reliable packaging performance.

Suitable Applications

Milk, Lactic Acid Bacteria, Soy Milk, Juice

Technical Specifications

Model Performance Data

Model	Sealing Heads	Capacity	Power (kW)
GL-10-10	10	4000	3
GL20-20	12	8000	3.2
GL-24-14	14	10000	3.2
GL-30-30	30	18000	4

Compatible Container Dimensions

50 mm

Min Diameter

90 mm

Max Diameter

110 mm

Min Height

280 mm

Max Height

Features & Components

Key Machine Features

- PLC control system
- Electric heating sealing
- Photoelectric pneumatic control
- Automatic lubrication system
- Optional screw capping capability
